

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

## A D V E R T I S E M E N T.

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions*, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society, as from repeated declarations, which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume: the Society, as a body, never interesting themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought adviseable, that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such, as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the chair, to be given to the authors of such papers, as are read at their accustomed meetings, or to the persons through whose hands they receive them, are to be considered in no other light than as a matter of civility, in return for the respect shewn to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public news-papers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports, and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.

## V O L. LXVIII. P A R T I.

- I. *A* LETTER from Sir William Hamilton, K. B. F. R. S. to Sir John Pringle, Bart. P. R. S. giving an Account of certain Traces of Volcanos on the Banks of the Rhine. page 1
- II. Of the Heat, &c. of Animals and Vegetables. By Mr. John Hunter, F. R. S. p. 7
- III. The Force of fired Gun-powder, and the initial Velocities of Cannon Balls, determined by Experiments; from which is also deduced the Relation of the initial Velocity to the Weight of the Shot and the Quantity of Powder. By Mr. Charles Hutton, of the Military Academy at Woolwich. Communicated by Samuel Horsley, LL.D. Sec. R. S. p. 50
- IV. A new Case in Squinting, by Erasmus Darwin, M. D. F. R. S.; communicated by Thomas Aftle, Esq. F. R. S. p. 86
- V. A Cure of a Muscular Contraction, by Electricity. By Miles Partington, in a Letter to William Henly, F. R. S. p. 97
- VI. An

- VI. *An Account of a large Stone near Cape Town. In a Letter from Mr. Anderson to Sir John Pringle, Bart. P. R. S.; with a Letter from Sir William Hamilton, K. B. F. R. S. to Sir John Pringle, on having seen pieces of the said Stone.* p. 102
- VII. *A Letter from Nathaniel Polhill, Esq. Member of Parliament for the Borough of Southwark, to Mr. John Belchier, F. R. S. on Mr. DEBRAW's Improvements in the Culture of Bees.* p. 107
- VIII. *An improved Method of tanning Leather. By David Macbride, M. D. communicated by Sir John Pringle, Bart. P. R. S.* p. 111
- IX. *Observations on the Population and Diseases of Chester, in the Year 1774. By J. Haygarth, M. D.* p. 131
- X. *An Account of some Electrical Experiments, by Mr. William Swift, in a Letter to John Glen King, D. D. F. R. S.* p. 155
- XI. *An Account of the Island of Sumatra, &c. By Mr. Charles Miller. Communicated by Edward King, Esq. F. R. S.* p. 160
- XII. *A Meteorological Diary, &c. kept at Fort St. George in the East Indies. By Mr. William Roxburgh, Assistant-surgeon to the Hospital at the said Fort. Communicated by Sir John Pringle, Bart. P. R. S.* p. 180
- XIII. *Experiments upon Air, and the effects of different kinds of Effluvia upon it; made at York. By W. White, M. D. F. S. A. Communicated by John Fothergill, M. D. F. R. S.* p. 194
- XIV. *An*

- XIV. *An Account of the Earthquake which was felt at Manchester and other Places, on the 14th Day of September, 1777. In a Letter from Mr. Thomas Henry, F. R. S. to William Watson, M. D. F. R. S.* p. 221
- XV. *Sundry Papers relative to an Accident from Lightning at Purfleet, May 15, 1777.* 232
- XVI. *On the Arithmetic of Impossible Quantities. By the Rev. John Playfair, A. M. Communicated by the Rev. Nevil Maskelyne, D. D. F. R. S. and Astronomer Royal.* p. 318
- XVII. *Reflections on the Communication of Motion by Impact and Gravity. By the Rev. Isaac Milner, M. A. Fellow of Queen's College, Cambridge. Communicated by Anthony Shepherd, D. D. F. R. S. and Plumian Professor at Cambridge.* p. 344
- XVIII. *Observations on the Limits of Algebraical Equations; and a general Demonstration of Des Cartes's Rule for finding their Number of affirmative and negative Roots. By the Rev. Isaac Milner, M. A. Fellow of Queen's College, Cambridge. Communicated by Anthony Shepherd, D. D. F. R. S. and Plumian Professor at Cambridge.* p. 380
- XIX. *Journal of a Voyage to The East Indies, in the Ship Grenville, Capt. Burnet Abercrombie, in the Year 1775. By Alexander Dalrymple, Esq. F. R. S. Communicated by the Hon. Henry Cavendish, F. R. S.* p. 389
- XX. *An Essay on Pyrometry and Areometry, and on Physical Measures in general. By John Andrew De Luc, F. R. S.* p. 419

- XXI. *Extract of a Register of the Barometer, Thermometer, and Rain, at Lyndon, in Rutland.* By Thomas Barker, Esq. Communicated by Sir John Pringle, Bart. P. R. S. p. 554
- XXII. *Journal of the Weather at Montreal.* By Mr. Barr. Communicated by Richard Saunders, M. D. F. R. S. p. 557
- XXIII. *Extract of Meteorological Observations made at Hawkhill, near Edinburgh.* By John M'Gouan, Communicated by Sir John Pringle, P. R. S. p. 562
- XXIV. *Extract of a Meteorological Journal for the Year 1777, kept at Bristol, by Samuel Farr, M. D.* p. 567
- XXV. *Journal of the Quantity of Rain that fell at Holme, near Manchester, from 1765 to 1769; and at Barowby, near Leeds, from 1772 to 1777.* By George Lloyd, Esq. F. R. S. p. 571
- A Meteorological Journal kept at the House of the Royal Society, by Order of the President and Council.* p. 573

## V O L. LXVIII. P A R T II.

- XXVI. *AN Account of the Island of St. Miguel. By Mr. Francis Maffon, in a Letter to Mr. William Aiton, Botanical Gardener to His Majesty. Communicated by Joseph Banks, Esq. F. R. S.* page 601
- XXVII. *An Account of a remarkable Imperfection of Sight. In a Letter from J. Scott to the Rev. Mr. Whiffon, of Trinity College, Cambridge. Communicated by the Rev. Michael Lort, B. D. F. R. S.* p. 611
- XXVIII. *An Account of Baptisms, Marriages, and Burials, during Forty Years, in the Parish of Blandford Forum, Dorset. Communicated by Richard Pulteney, M. D. F. R. S.* p. 615
- XXIX. *Part of a Letter from Matthew Guthrie, M. D. of Petersburg, to Dr. Priestley, F. R. S. on the Antiseptic Regimen of the Natives of Russia.* p. 622
- XXX. *Astronomical Observations made in the Austrian Netherlands in the Years 1773, 1774, and 1775. By Nathaniel Pigott, Esq. F. R. S. Foreign Member of the Academies*

- Academies of Bruffels and Caen, and Correspondent of the Royal Academy of Sciences at Paris.* p. 637
- XXXI. *Observations on the Scurvy.* By Charles De Mer-  
tans, M. D. Dated Vienna, Jan. 14, 1778. p. 661
- XXXII. *Comparison between Sir George Shuckburgh and  
Colonel Roy's Rules for the Measurement of Heights with  
the Barometer; in a Letter to Col. Roy, F. R. S. from  
Sir George Shuckburgh, Bart. F. R. S.* p. 681
- XXXIII. *An Account of the Calculations made from the  
Survey and Measures taken at Schehallien, in order to  
ascertain the mean Density of the Earth.* By Charles  
Hutton, Esq. F. R. S. p. 689
- XXXIV. *An Account of the Blue Shark, together with  
a Drawing of the same.* By W. Watson, jun. M. D.  
F. R. S. p. 789
- XXXV. *A Description of the Exocoetus Volitans, or Fly-  
ing Fish.* By Thomas Brown, Surgeon, near Glasgow.  
Communicated by Dr. Fothergill, F. R. S. p. 791
- XXXVI. *Reasons for dissenting from the Report of the  
Committee appointed to consider of Mr. Wilson's Expe-  
riments; including Remarks on some Experiments ex-  
hibited by Mr. Nairne.* By Dr. Musgrave, F. R. S.  
p. 801
- XXXVII. *Experiments on Electricity, being an Attempt to  
shew the Advantage of elevated pointed Conductors.* By  
Mr. Edward Nairne, F. R. S. p. 823
- XXXVIII. *On the Use of an Amalgam of Zinc, for the  
Purpose of electrical Excitation, &c.* By Bryant Hig-  
gins, M. D. in a Letter to Richard Brocklesby, M. D.  
F. R. S. p. 861
- XXXIX.

- XXXIX. *Chemical Experiments and Observations on Lead Ore.* By Richard Watfon, D. D. F. R. S. in a Letter to Sir John Pringle, Bart. P. R. S. p. 863
- XL. *Description of a most effectual Method of securing Buildings against Fire, invented by Charles Lord Viscount Mahon, F. R. S.* p. 884
- XLI. *A Method of finding, by the Help of Sir Ifaac Newton's binomial Theorem, a near Value of the very slowly-converging infinite Series  $x + \frac{x^2}{2} + \frac{x^3}{3} + \frac{x^4}{4} + \frac{x^5}{5} + \&c.$  when  $x$  is very nearly equal to 1.* By Francis Maseres, Esq. F. R. S. Curfitor Baron of the Exchequer. p. 895
- XLII. *A Method of extending Cardan's Rule for resolving one Case of a Cubick Equation of this Form,  $x^3 * - qx = r$ , to the other Case of the same Equation, which it is not naturally fitted to solve, and which is therefore often called the irreducible Case.* By Francis Maseres, Esq. F. R. S. Curfitor Baron of the Exchequer, p. 902
- XLIII. *Account of the Advantages of a newly-invented Machine much varied in its Effects, and very useful for determining the perfect Proportion between different Moveables acting by Levers and Wheel and Pinion.* By Mr. Le Cerf, Watch-maker at Geneva; Communicated by Lord Viscount Mahon, F. R. S. p. 950
- XLIV. *New Experiments upon the Leyden Phial, respecting the Termination of Conductors.* By Benjamin Wilfon, Esq. F. R. S. p. 999
- XLV. *Observations on the Solar Eclipse which happened June 24, 1778.* By Mr. William Wales, F. R. S. and Master of the Royal Mathematical School in Christ's Hospital. p. 1013
- XLVI.

- XLVI. *An Eclipse of the Sun June 24, 1778, observed at Leicester. By the Rev. Mr. Ludlam, Vicar of Norton, near Leicester; communicated by the Astronomer Royal.* p. 1019
- XLVII. *A ready Way of lighting a Candle, by a very moderate Electrical Spark. By John Ingenhoufz, M. D. F. R. S.* p. 1022
- XLVIII. *Electrical Experiments, to explain how far the Phenomena of the Electrophorus may be accounted for by Dr. Franklin's Theory of positive and negative Electricity. By John Ingenhoufz, M. D. F. R. S.* p. 1027
- XLIX. *Observations and Experiments tending to confirm Dr. Ingenhoufz's Theory of the Electrophorus; and to shew the Impermeability of Glass to Electric Fluid. By William Henly, F. R. S.* p. 1049
- L. *Track of His Majesty's armed Brig Lion, from England to Davis's Streights and Labradore, with Observations for determining the Longitude by Sun and Moon and Error of common Reckoning; also the Variation of the Compass and Dip of the Needle, as observed during the said Voyage in 1776. By Lieutenant Richard Pickersgill, late Commander of the said Vessel; communicated by Nevil Maskelyne, D. D. F. R. S. and Astronomer Royal.* p. 1057
